TITLE : STRETCHABLE MATERIAL

ABSTRACT : PURPOSE: To inexpensively provide a stretchable material composed of a composite nonwoven fabric suitable for a corset, footwear, gloves, a sanitary material such as a paper diaper, a percutaneous drug base fabric or the like, low in basis wt. and having sufficient humidity permeability and stretchability.

CONSTITUTION: A stretchable material is obtained by integrally fusing a nonwoven fabric and a film and has such a structure that a part of the fibers constituting the nonwoven fabric pierces the film and the humidity permeability thereof is 3500g/m<sup>2</sup>.24hr or more and the elastic recovery thereof at a time of 100% elongation in at least one direction is 80% or more.
